

Race Videos

Posted by spec944#74 - 07 Dec 2008 01:24

I recently subscribed to a video hosting site called Vimeo that allows me to upload full length race videos in very good quality and thought some of you might want to see them. I have posted the NASA sprint race from last weekend as well as an SCCA race from November and another that I ran in yesterday. The link is:

www.vimeo.com/user319106/videos

There is a progress bar and volume control at the bottom of the screen and to the right of that is a icon that looks like a 4 bladed propeller. Clicking that icon takes you to full screen video. You can also download the videos in mp4 format but you will want to have a high speed modem to do that because even the smallest one is around 800 mb.

Constructive criticism and sarcastic remarks welcomed!
