

Video of Aubie and Jerry at Infineon

Posted by rd7839 - 28 Oct 2008 07:27

Video is a little better than last time. Wish I could have kept up!

Nice save at turn 4(7:18)

I like that camera angle, I can see who is shifting where.

Great pass of the 911 in the ess's. You got past him without too much time lost. It would have been brutal to be stuck behind him clear through there.

Keep working on things, you are getting there. I think there are a few things you can do to get faster quick. One is to practice several driver skills (left foot braking and trail breaking) and the rest is mental and you are working on that as well.

Good job over the weekend. I look forward to racing with you again soon.

Thanks Big Dog, I really appreciated all the help you gave and tried to implement everything you suggested. Not to make excuses but i was not on my game mentally that weekend and am just happy I didn't make any costly mistakes. I DO promise that I'll be ready to give you some competition next season at Thunderhill and will race you for a cold beer!

Ron
