90% complete 944spec car with 2 engines

Posted by Tabbasco - 22 Mar 2013 06:30

I am sad to sell this project but just do not have the time to complete the task.

The car is lightened and caged >2350 lbs.

1st engine has 67k miles and was running perfectly before removal. The second engine has rebuilt head, bearings replaced and is a quick rebuild.

Oil cooler parts

Weltmeister Rear Bar

Koni Shocks

Extra set of brakes, lots of brake pads

Cut out switch

1 aluminum and 2 sets of steel Arms (one set is reinforced)

Extra flywheel and Pressure plate

2 hatches

I had originally planned to Lemons the car first and then 944 Spec.

This car can be finished for less than \$1500

The car was tracked recently and everything worked well.

\$2500 OBO

Is car still available? Where is it?

Thank you,

Brad Sullivan

Yes it's still available, it's in Ft Worth Texas and it has a tow bar so no trailer is needed.

Could you please email me at

This e-mail address is being protected from spambots. You need JavaScript enabled to view it

with your phone number.

I'm in Dallas and would be interested in taking a look.

Mark

Phil

No worries, I will get them back to you ASAP. I was still trying to figure out the bar situation, I supposedly have the steel Armed front Weltmeister bar and mounting plates too!

Todd
