Do you still have this car for sale? The ad says SP-1 but the car decal says SP-2.

The car is still for sale.

The photo was taken after the car was painted and the decals installed and at the time I wasn't sure whether to run SP1 or SP2.

The car does not have a header nor an engine retune to run 110 octane fuel. It is currently wearing Toyo RR tires, which would also need to be changed to Hoosier's to be competitive in SP2.
