

Need 2 Spindle Clamp Nuts and Washers!

Posted by robweber1 - 04 Apr 2017 15:58

Hey all,

While rebuilding my front hubs and installing new wheel bearings, I inadvertently (and admittedly stupidly) threw out the two spindle clamp nuts and notched washers that I had wrapped up in a paper towel. I looked online for replacements, and like everything German they are pricey; about \$70+ a set. Looking for a bit of a better deal than that. Does anybody have a set of two clamp nuts and washers lying around that they could part with?

Thanks!

Rob
