Guys, I can't release the details just yet, but very soon, Ira Ramin will be offer his awesome Tarret Bars at a substantial discount *only* for 944 Spec racers.

We have been working on blocks to adapt the bars to the early steel arms, and Tarret now have the solution in stock. I have been running this on my car for a while now, and it is awesome! If you haven't seen the quality that Tarret delivers, you'll be blown away - these pieces are works of art. Effective, light, with high quality hardware, and now more affordable as well.
