I found these old vids of 944 racing back in the day when they were still in production. I believe they are 944 Turbo Cup Cars. The VFMCMidia channel on youtube has many of these. Just scroll through and watch a few, cool stuff!!

Some crashes and fire....

That's a lot of 944's - we want fields like that!

I was going to wonder where they all are, but after watching the videos, I'm not sure there are any left. That makes Spec Piniata look like a Kumbaya party.
