

Ground Control Coilover Question

Posted by 1M Fan - 17 Aug 2012 06:54

I'm wondering if these are legal in 944 Spec class if a standard valve strut is used.

Thanks, Ground Control said they would use the standard part numbers.

If the strut insert is shorter it cannot be the same as the Koni off the shelf unit. It may be valved the same, but it is no longer the same even if they left the same part number on it.

Understand, their strut holder won't work, so they would have sold the standard strut inserts with their coil over kit.
