

Need - Roller with Cage

Posted by Takumi - 08 Oct 2015 18:04

Hi All,

Well after nearly 7 years of racing, I finally crashed my car and I can't fix it due to way it hit. I am looking for a 944 car with a good welded cage (hanksville if possible). I will be transferring the over most of the parts, so a stripped roller or one with a blown motor/trans would be best. All I really need is a straight body + cage. I have everything else. If possible in the midwest/great lakes region.

Thanks Sid
