Due to problems with our previous mechanic/sponsor, Ray Freundt & I are in need of transmission work before the NASA National championships Sept 11th. If anyone is interested in taking this on, or knows someone who would be, let me know.

Will pay well, and put your graphic on our race cars at the National Championships in gratitude. Time is critical. We are willing to drive up to 300 miles or more to get this done. We've been left in a crunch, any help is appreciated! DART is an option, but it makes me nervous to send our trans 1,000 miles away at this late date.
