ALL racers please weigh in- What brand pads u use?  Posted by dpRacing Dan - 24 Feb 2017 14:00
The quick and short of this post is that NASA wants me to mandate HAWK pads on all cars starting immediately. I am refusing to stick this into the rules without consulting the group, especially so sudden
I know I use Hawk, but does anyone else not use hawk that competes with NASA? If so? Reasons? Advantages?
Thanks- cross- posted on FB as well.

I currently use carbotech, however will be testing the new Hawks. Unless there is some monetary incentive to use a specific brand of product not a fan of being required by rule to use.

Using HAWK in the build, but if they don't suit my driving style with this car I would prefer not being limited - especially if the contingency support is broken as mentioned.

Not even sure how they would enforce that silly requirement since the pads loose most identifiable markings after just a couple sessions and heated to temp. It would be a waste of time trying to enforce so what good would it do.

Hawk blue F+R.

## **944-SPEC - 944SPEC - low cost wheel to wheel racing** Generated: 5 November, 2025, 15:43

Prefer not to mandate unless better contingency is offered.
