

Reminder: decent 944 docs in HTML

Did a quick search and found one reference to these docs on these forums. Thought it was worth posting a thread about them for anyone that wasn't familiar with them.

Certainly would like to know of other 944 manuals, but I like these being HTML pages instead of scanned images/PDF. The images aren't very high res, but good enough and I also have the PDF versions commonly linked from that UK site.
