

Alternator

Posted by Salanis42 - 17 Jan 2010 13:36

I think I have a bad alternator, but I'm troubleshooting it.

Does anyone know if the alternator is internally or externally regulated? If I find the alternator isn't working right (which seems to be the case), I'm wondering if I can just bring in the alternator itself, or if I need to bring the whole car to my electrically knowledgeable dad.
