

Cordless re-chargeable air pump

Posted by cbuzzetti - 16 Mar 2010 02:59

Hi Guys, some of you saw this at Cal Speed and were interested so I am posting the info here.

This little pump works great for topping off tires in the pits or track side. Way easier than carrying the big bottle.

Says it will pump up to 100+ PSI. Not super fast but it does work good. Buy the spare battery for it.

www.jerrybickel.com/wheels-tires-tire-ga...eable-jbrc4050c.html

This is a great buy at \$49.95
