

Sparco Touring VTR seat

Posted by cullenwinter - 24 May 2008 10:29

I'm looking at a used Sparco Touring VTR seat, possibly using it for my drivers seat, and putting my Pro 2000 in the passenger spot for instructing (and since I'm slightly under weight) Are any of you guys using this seat ? I'm curious how much the big halo has affected your ingress/egress. Anybody using it with a Hans yet ? Thanks

After my little rub with CJ I will be looking at seats with a halo ...

It is not too bad getting in and out without the HANS with a little practice. I haven't tried it with, but I'm sure it will be the same. After Gateway, I'm glad I had a halo seat. I was not sore at all as the halo kept my head from moving from side to side.

Thanks Dave. Do you have the VTR or the newer touring model ? The VTR's halo looks much larger.
