

## Master cylinder

Posted by rd7839 - 07 May 2013 07:21

---

Hey guys, I've heard repeatedly that you can't mix and match Girling and Ate parts like master cylinder and booster but Clark's garage says otherwise. The Girling m.c. Is a lot cheaper but will it work? If not why?

If you need it, I have a Girling booster too.

Thanks, I missed that topic. So it seems the big difference is steel vs aluminum. At 1/4 the price, I'll take the steel one!

Al. is several grams lighter and the master cylinder is higher up, Ron. The extra money will cut your lap times by at least 2.5 seconds per lap!
