

944 spec build a couple of questions

Posted by deadeyeb - 22 Feb 2009 06:17

newbie here with a question. do you guys run the speedo cable or the e brakes on your cars? what do you do to get rid of the wiring you don't need under the dash? i have a 83 944 and if somebody has anything on the wiring that would be helpfull, color coding on the wires would really help. thanks for any help and enjoy. here are some pics of my work in progress.
