## 944-SPEC - 944SPEC - low cost wheel to wheel racing

Generated: 1 September, 2025, 20:41 AC delete bracket source? Posted by Chris - 14 Apr 2008 00:22 I know some of you that bought the AC delete bracket actually called the company that produces them and had them match their ebay price and ship directly. Any way I could get that contact info and the price? Much appreciated, Chris Re:AC delete bracket source? Posted by cullenwinter - 14 Apr 2008 01:01 Ka-pow!! www.broadfootracing.com/ found it on page 5 of this thread www.nasarockymountain.com/n asa forums/sh...t=alternator+bracket My junkyard bracket (thanks to Ken) is really sturdy and working out well. Did you break another turnbuckle? Re:AC delete bracket source?
Posted by Chris - 14 Apr 2008 01:09 Thanks, Cullen i did, which makes 3 turnbuckles ive broke. I saw dave w's and liked how it moves the alternator out of the way of the hoses and intake, plus lower center or gravity is a + \_\_\_\_\_\_

My junkyard bracket (thanks to Ken) is really sturdy and working out well.

I fabricated a bracket for Michelle's car out of some scrap 3/16 x 1" steel bar stock. Made it exactly like the one in our Tech section, even though I didn't have a Martha Stuart ruler.

Works fine, lasts a long time!!

I use the Porsche factory A/C delete bracket. Works great and I have never had an issue with the turnbuckle in all my years of racing the car.
