

Final input on rules change proposals

Posted by Sterling Doc - 08 Nov 2012 11:11

OK, so we need to wrap up the rules change proposals wrapped up. While this is not a strictly democratic vote, it may influence the final decisions. As the other thread has gotten pretty muddy, I'd like just a straight up or down vote on the following proposals:

1) Allow external fabricated headlight covers to replace existing OEM covers. Cars with existing OEM cover would be allowed to fill in, cover or tape seams around the headlight cover for parity.

2) Allow external transmission coolers

3) Increase minimum weight to 2,700 lbs

If the wheel weight concern becomes a formal proposal today, we may vote on that as well.
