Tranny	/ Mount	Mod	seems	silly

.

OK so I know we can 'fill' the void in the single point mount to stiffen it with polyurethane. This is a little silly dont you think? I mean we are stiffening the mount, but we could do this with a bracket style mount both better and cheaper than the cost of the polyurethane.

Can I propose we allow any mount so long as it is dimensionally equal (mount position). I can weld up a bracket in like 10 mins.

Thoughts?
